

Strainer Inlet Type Fuel Pump Duty Cycle 30 Min NPT2" Outlet

Our Product Introduction

For more products please visit us on refueling-equipment.com

Basic Information

- Place of Origin: China
- Brand Name: Virette
- Model Number: f0

Product Specification

- Sealing Ring Included: Yes
- Compatibility: Universal
- Duty Circle: 30 Min
- Float Included: Yes
- Outlet: NPT2"
- Engine: Diesel Fuel Engine Parts
- Type: Electric
- Inlet Type: Strainer
- Highlight: **Strainer Inlet Type Fuel Pump ,
Fuel Pump NPT2" Outlet,
Fuel Pump Duty Cycle 30 Min**

Product Description

Strainer Inlet Type Fuel Pump with 15Kgs Capacity and NPT2" Outlet

Product Description:

The Fuel Pump is fitted with an Inlet Type Strainer that helps to filter out any impurities and debris that may be present in the fuel before it is delivered to the engine. This ensures that the engine is protected from any damage that may be caused by the impurities and debris. The Strainer is easy to clean and maintain, ensuring that the Fuel Pump operates smoothly and efficiently.

The Outlet of the Fuel Pump is NPT2", which provides a secure and reliable connection to the fuel line. This ensures that there are no leaks or spills during the fuel dispensing process, which can be dangerous and costly. The NPT2" Outlet is easy to install and operate, making it ideal for use in various applications.

The Fuel Pump has a weight of 15Kgs, making it easy to transport and install. Its compact design ensures that it can fit in tight spaces, making it ideal for use in various applications where space is limited. The lightweight design also makes it easy to move the Fuel Pump from one location to another, ensuring that it can be used in various locations with ease.

The Fuel Pump comes with a Sealing Ring Included, ensuring that there are no leaks or spills during the fuel dispensing process. The Sealing Ring is easy to install and replace, ensuring that the Fuel Pump operates smoothly and efficiently. This helps to reduce downtime and maintenance costs, ensuring that the Fuel Pump is always ready for use.

The Fuel Pump comes with a 1-Year Warranty, ensuring that the customer is protected against any defects or malfunctions that may occur during the first year of use. This provides peace of mind to the customer, knowing that they have invested in a high-quality Fuel Pump that is designed to last.

In conclusion, the Electric Fuel Delivery System is an innovative and reliable Fuel Dispensing Pump that is designed to provide a high-quality solution for dispensing Liquid Fuel. Its high-quality construction, Inlet Type Strainer, NPT2" Outlet, lightweight design, Sealing Ring Included, and 1-Year Warranty make it the ideal choice for various industries. Whether it is used in the automotive, agriculture, or construction industry, the Electric Fuel Delivery System is sure to provide a reliable and efficient solution for dispensing Liquid Fuel.

Features:

Product Name: Fuel Pump

Engine: Diesel Fuel Engine Parts

Sealing Ring Included: Yes

Sending Unit Included: No

Compatibility: Universal

Inlet Type: Strainer

Electric Fuel Delivery System

Automotive Fuel Supply Device

Gasoline Transfer Pump

Technical Parameters:

Sending Unit Included	No
Engine	Diesel Fuel Engine Parts
Float Included	Yes
Compatibility	Universal
Weight	15Kgs
Duty Circle	30 Min
Inlet Type	Strainer
Outlet	NPT2"
Sealing Ring Included	Yes
Warranty	1 Year

Applications:

One of the primary applications of the Virette f0 fuel pump is in the filling station dispenser. Filling station dispensers are used to dispense fuel to customers who drive in to fill their tanks. The electric fuel delivery system of the Virette f0 is perfect for this application, as it provides a consistent and reliable flow of fuel. The sealing ring included with the product ensures that there are no leaks, making it a safer option for customers and employees.

The Virette f0 fuel pump is also suitable for use in other electric fuel delivery systems. For example, it can be used in fuel transfer pumps that are used to transfer fuel from one container to another. The NPT2" outlet makes it easy to connect to hoses and other fittings, making it a versatile option for fuel transfer applications.

In addition to these applications, the Virette f0 fuel pump can be used in a variety of scenarios. For example, it is an excellent option for agricultural applications, where it can be used to fuel tractors and other farming equipment. It is also suitable for use in boats and other marine vehicles, where a reliable electric fuel delivery system is essential.

Overall, the Virette f0 fuel pump is a versatile and reliable product that is suitable for a wide range of applications and scenarios. Its universal compatibility, electric fuel delivery system, and sealing ring make it an excellent option for filling station dispensers, fuel transfer pumps, and other applications where a consistent and reliable flow of fuel is essential.

Customization: Product Customization Services:

Brand Name: Virette

Model Number: f0

Place of Origin: China

Type: Electric

Compatibility: Universal

Float Included: Yes

Engine: Diesel Fuel Engine Parts

Outlet: NPT2"

This fuel pump can be customized for various applications such as gasoline infusion machine, liquid fuel dispenser, and gasoline infusion machine.

Packing and Shipping:

Product Packaging:

One Fuel Pump

Installation Instructions

Shipping:

Ships within 24 hours

Free Shipping within the United States
