

50bar Diesel Fuel Flow Meter 4mA-20mA Output Gas Flowmeter

Basic Information

- Place of Origin: China
- Brand Name: Virette

Product Specification

- Output Signal: 4-20mA
- Communication: RS485, HART
- Operating Humidity: <100%RH (no Icing, No Condensation)
- Dimensions: 200mm*94mm*40mm
- Installing Hole: 10
- Type Of Liquid: Liquid
- Operating Pressure: <50bar
- Voltage Output: DC12v/14v
- Highlight: **50bar diesel fuel flow meter, diesel fuel flow meter 4ma, 50bar gas flowmeter**

Product Description:

The Hydraulic Flow Meter is easy to install, with a 10mm installing hole that fits most hydraulic systems. Once installed, this gas flow meter is highly responsive and offers a quick response time, making it an essential tool for detecting changes in flow rates and identifying potential issues in the system.

Our flow detector features a digital display that shows the flow rate in real-time and is easy to read even in low light conditions. The display also features a flow gauge that helps to monitor flow rate trends and identify any changes that may indicate a problem in the hydraulic system.

The Hydraulic Flow Meter is built to withstand tough working conditions and offers reliable performance even in harsh environments. It is designed to operate at a maximum pressure of 50bar and features a compact, lightweight design that makes it easy to move and install. This gas flow meter is also designed to operate in a range of humidity conditions, with an operating humidity of less than 100%RH (no icing, no condensation). This ensures that the device operates reliably even in environments where humidity levels may fluctuate. Our Hydraulic Flow Meter is available for timely delivery and is an essential tool for any hydraulic system. Whether you are looking to monitor flow rates, detect changes in flow, or identify potential issues, this flow detector is the perfect tool for the job. Order now and experience the benefits of reliable and accurate flow rate measurement!

Features:

Product Name: Flow Meter

Keyword: Hydraulic Flow Meter

Voltage Output: DC12v/14v

Communication: RS485,HART

Diameter Nominal: DN80,DN100

Operating Humidity: <100%RH (no Icing, No Condensation)

Keywords: flow measurer, liquid flow meter, flow indicator

Technical Parameters:

| | |
|--------------------|-------------------------------------|
| Voltage Output | DC12v/14v |
| Installing Hole | 10 |
| Communication | RS485,HART |
| Output Signal | 4-20mA |
| Pipe Size | DN15mm~6000mm |
| Dimensions | 200mm*94mm*40mm |
| Range | 2.5-1836L/Min, 0.3-47881m3/H |
| Operating Pressure | <50bar |
| Diameter Nominal | DN80,DN100 |
| Operating Humidity | <100%RH (no Icing, No Condensation) |

This product is a gas flow meter, gas flow meter, volumetric flow meter.

Applications:

One of the key features of the Virette flow meter is its ability to operate under low pressure conditions. This liquid flow meter can handle pressures of up to 50 bar, making it ideal for use in a wide range of industries and applications. Whether you are working in a laboratory, a manufacturing plant, or a chemical processing facility, the Virette flow meter can help you accurately measure the flow rate of your liquids.

The Virette flow meter is available in a range of pipe sizes, from DN15mm to DN6000mm. This means that you can choose the perfect size for your application, whether you are working with small pipes or large ones. Additionally, the Virette flow meter features a DC12v/14v voltage output, which ensures that you get accurate readings every time.

Another important feature of the Virette flow meter is its timely delivery. When you order this flow sensor, you can be sure that it will be delivered to you quickly and efficiently. This means that you can start using your new flow detector right away, without having to wait for weeks or months for it to arrive.

The Virette flow meter is ideal for use in a wide range of applications and scenarios. Whether you are measuring the flow rate of water in a swimming pool, monitoring the flow of chemicals in a processing plant, or measuring the flow rate of oil in a pipeline, the Virette flow meter is the perfect solution. So if you need a reliable and accurate flow sensor, look no further than the Virette flow meter.

Customization:

Product Packaging:

Flow Meter device

Instruction manual

Mounting hardware

Calibration certificate

Shipping:

Packing and Shipping:

Shipped via UPS ground

Tracking number provided via email

Shipping time may vary depending on location

Product will be securely packaged to prevent damage during transit
