

Efficiency Filling Station Dispenser 50L/min With Precision Measurement And LCD Display

Our Product Introduction

For more products please visit us on refueling-equipment.com

Basic Information

- Place of Origin: China
- Brand Name: Virette
- Model Number: LD-1
- Minimum Order Quantity: 1 set
- Delivery Time: 20 days

Product Specification

- Type: Fuel Dispenser
- Dispensing Flow Rate: 50L/min
- Rating Power: <100W
- Gas-filling Preset Range: 1~9900 Kg
- Rated Working Pressure: 16MPa
- Model: LNG-1000
- Display: LCD
- Temperature Range: -40°C To 50°C
- Highlight: **Efficiency Filling Station Dispenser,
LCD Display Filling Station Dispenser**

Product Description

Product Description:

The LNG Gas Dispenser can be powered using either AC220V or DC24V, which makes it suitable for use in different environments. It features a gas-filling preset range of 1~9900 Kg, which allows for precise and accurate fuel dispensing. The dispenser has a low rating power of less than 100W, which helps to reduce the energy consumption and operating costs.

The ambient humidity range for the LNG Gas Dispenser is 30%~90%, which makes it suitable for use in different weather conditions. The dispenser is designed to withstand harsh weather conditions, such as extreme temperatures, humidity, and rain. It is built with high-quality materials that are resistant to corrosion, rust, and wear.

The LNG Gas Dispenser is a versatile product that can be used for different applications. It is suitable for use in filling stations, vehicle fleets, and industrial plants. The dispenser is easy to install and operate, which makes it an ideal choice for businesses that need a reliable and efficient gasoline infusion machine.

The LNG Gas Dispenser is a reliable and efficient product that helps to improve the fuel management and control in filling stations. It is an ideal choice for businesses that need a safe, accurate, and cost-effective solution for fuel dispensing. The dispenser is designed to meet the highest quality standards, which ensures that it will deliver consistent and reliable performance for years to come.

Applications:

The LD-1 model is manufactured in China and has a minimum order quantity of 1 set. The delivery time for this product is 20 days, ensuring that you can receive your order in a timely manner. The dispenser has a gas-filling preset range of 1~9900 Kg and a dispensing flow rate of 50L/min, which makes it an efficient and reliable option for your fuel delivery needs.

The dispenser is also equipped with advanced features such as an ambient humidity range of 30%~90% and an accuracy rate of +1.0%. These features ensure that the dispenser is able to operate effectively in a wide range of environmental conditions while maintaining precise measurements. The LNG-1000 model is suitable for use with a variety of fuels, including natural gas, propane, and butane.

The Virette LD-1 LNG Gas Dispenser is a versatile product that can be used in a variety of applications. One of the most common uses for this product is in gas stations and petrol stations, where it is used as a gasoline transfer pump. It is also an ideal choice for petroleum transfer stations, where it is used as part of an electric fuel delivery system. The dispenser's high flow rate and accuracy make it an excellent choice for these applications, ensuring that fuel is delivered quickly and efficiently with minimal waste.

In addition to its use in traditional fueling stations, the LD-1 model is also suitable for use in other industries that require the transfer of liquefied natural gas. This includes industries such as manufacturing, transportation, and energy production. No matter what your fuel delivery needs are, the Virette LD-1 LNG Gas Dispenser is an excellent choice that is sure to meet your requirements.

Customization:

The Virette LD-1 is a fuel dispensing pump that originates from China and has a rated working pressure of 16MPa. The dispenser comes with an LCD display that allows for easy monitoring and control. The power supply can be either AC220V or DC24V to meet your specific electrical requirements. The flow rate can be adjusted from 1 to 80 Kg/min to meet your fueling needs.

The minimum order quantity for the Virette LD-1 is 1 set and the delivery time is 20 days. Trust our product customization services to deliver the perfect solution for your fuel dispensing needs.

Support and Services:

Our LNG Gas Dispenser product comes with comprehensive technical support and services to ensure smooth operation and maximum efficiency. Our team of experts is available to provide guidance and assistance with installation, commissioning, and maintenance of the dispenser. We offer training programs to ensure your staff is well-equipped to handle any issues that may arise during operation. Additionally, we provide remote monitoring and diagnostics to identify and resolve any potential problems before they cause any disruptions. Our focus is on providing exceptional customer service and ensuring your LNG Gas Dispenser operates reliably and efficiently.
